### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joseph W. Staley on 08/26/2010.

The application has been amended as follows:

Amended language is indicated by an underline.

81. (Examiner Amended) A lancing device comprising:

a housing;

a cassette removably mounted within said housing, said cassette comprising a plurality of lancets, each lancet having a lancet body and a protective cap; a piston for propelling a lancet along a path of travel, said piston having a lancet coupling portion for releasably engaging and retracting the lancet to separate the lancet body and the protective cap along a retraction portion of the path of travel of the lancet, and thereafter advance the lancet along the path of travel into a lancing position;

a plurality of guide members corresponding to the plurality of lancets and at least one of said guide members per each lancet and in association therewith, each guide member being aligned transversely to the path of travel of the corresponding lancet within the cassette for engaging the separated protective cap of the corresponding lancet to guide the protective cap out of the path of travel;

Art Unit: 3736

and a retainer positioned within the cassette adjacent each guide member to retain the separated protective cap.

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

Regarding claims 1 and 81, the prior art fails to teach or suggest a lancing device comprising at least one guide member associated per lancet which is aligned transversely to the lancet path of travel and guides a protective cap out of the path of travel adjacent to a retainer adjacent each guide member to retain the protective cap in combination with the limitations set forth in claims 1 and 81 which allows the device to provide the lancets in an initial protected state wherein the cap is biased out of the way for lancing and then retained in the cassette for sterility and disposal.

Regarding claim 78, the prior art fails to teach or suggest a lancing device comprising a retainer having a plurality of spring elements which directly engage and bias the protective caps out of the path of travel in combination with the limitations set forth in claim 78 which allows the device to provide the lancets in an initial protected state wherein the cap is biased out of the way via the spring elements in order to permit the lancet to lance the skin.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 3736

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Contact Information***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MICHAEL C. STOUT whose telephone number is (571)270-5045. The examiner can normally be reached on M-F 7:30-5:00 Alternate (Fridays).
